

DO YOU KNOW CANNABIS?

Our 2023 Cannabis Survey gave us a clearer picture of how people in our community understand and use non-medical cannabis. We've pulled together key findings to help you stay informed and make decisions. Take a look at the highlights below.

PEOPLE WHO USE CANNABIS ARE USING MORE OF IT

Among those that used cannabis:

Daily cannabis use increased from **23% in 2018** to **29% in 2023**.

42% reported increased consumption since legalization.

OUR KNOWLEDGE IS IMPROVING BUT WE'RE NOT THERE YET

41% of respondents were unaware of the delayed effects of edibles. This increases the risk of overconsumption and negative health effects.

1 in 3 respondents were unaware that **youth (<25)** face greater cannabis-related harms compared to adults.

Only **10%** were aware of Canada's Lower-Risk Cannabis Use Guidelines (LRCUG).

UNDERSTANDING THE RISK TO BABIES & CHILDREN

1 in 4 respondents disagreed or were unsure that cannabis use during pregnancy can harm the baby.

Cannabis use during pregnancy can increase the risk of **preterm birth** (being born too early) and **low birth weight**. It can also impact **brain development**, affecting learning, memory and problem-solving in children.

DID YOU KNOW?

CANNABIS AFFECTS OUR ABILITY TO DRIVE

13% of respondents that used cannabis reported driving within two hours of use.

Cannabis effects last up to **6 hours** (smoking/vaping) and **12 hours** (edibles), but impairment can last for **24+ hours**. Plan ahead—use a designated driver, rideshare or public transit.

DID YOU KNOW?

BROADER TRENDS

Ontario and Canadian data show...

Pediatric (0-12) Cannabis Poisonings

A rise in poisonings, especially from edibles, since legalization.

Stronger THC & Health Risks

High-potency cannabis products have increased since legalization, likely contributing to rising cases of severe nausea, mental health issues and other health harms.

Youth Mental Health

Youth (13-24) have the highest rates of emergency department visits for cannabis-related mental health concerns.

Survey Notes: Survey findings are representative of respondents and not necessarily the broader Wellington-Dufferin-Guelph population. This was an anonymous, voluntary online survey conducted with residents of Wellington County, Dufferin County and the City of Guelph, aged 16 and older. A total of 2,082 valid and complete responses were collected between June 1 and July 7, 2023.
